## Thomas Blug's "ACADEMY OF TONE" with the BluGuitar AMP1 Mercury Edition at [dealer]

Virtuoso German guitarist and official "Strat King of Europe" Thomas Blug will be visiting [country] to give a series of in-store talks and live performances with his innovative BluGuitar **AMP1 Mercury Edition**.

Thomas will be demonstrating the revolutionary **AMP1 Mercury Edition** and its family of accessories at our store on [date] at [time]. Drawing on his many years of experience as a professional musician, Thomas will be illustrating the full potential of the **AMP1 Mercury Edition's** sound and programming capabilities. He will also be available for questions regarding all aspects of the system.

The unique **AMP1 Mercury Edition** delivers the enormous power and character of old tube amps without loss or compromise in a small and lightweight package. It can be scaled to the individual needs of the guitarist: In combination with the additional components **REMOTE1**, **LOOPER KIT** or **MIDI1**, from a simple "stand-alone amp" to a customized, programmable amplifier system, everything is possible.

Matching the "boutique-to-go" concept, BluGuitar offers the **FATCAB**, the **NANOCAB** and the **TWINCAB**, a family of guitar cabinets that offer great tone in a compact format. This is complemented by the innovative **BluBOX VSC**, a DI box with a virtual collection of 16 of the most popular guitar cabinets in history for live and studio purposes.

As Thomas himself says, "the AMP1 Mercury Edition is not only the most compact valve amp, it can be scaled to your needs from purist, straight forward tone, up to a fully programmable, midi-enabled system with almost endless options."
